“Everything changes, except change itself.” — Heraclitus of Ephesus

1. Reality is composed of state and change;

State

Change

2. The state represents what is observable and mutable;

4. The change moves one state to another;

5. The change of state represents time;

6. Changes have compatibility relations (order) among themselves;

7. Logos is defined as the order of changes;

8. Metaphysics is defined as the study of the plane of changes;

9. Language, metaphysics, manifestation, programming, mathematics, consciousness, reality, and Logos are isomorphic;

10. Flow is a visual programming language that describes and systematizes the plane of changes.
